

# **Data Analytics**

## **Course Overview**

Data analysis is the process of extracting information from data. It involves multiple stages, including establishing a data set, preparing the data for processing, applying models, identifying key findings and creating reports. Data analysis aims to find actionable insights that can inform decision-making. This course teaches you essential statistical knowledge and how to apply it to different business questions. After completing this course, you can analyze your data quickly and visualize your results.

#### **Course Outline**
